10 - If you responded with a score of 3 or below for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please describe a change that you believe would improve that aspect of the course.

Response Rate	30/119 (25.21%)
• No • N/A • I dont think I gained the ability to communicate effectively on the subject. • n/a • I think the course was greatly designed. A change that would be better is a study guide before each mid term. • This instructor was incredible for the course provided, however, I am not confident that requiring an economics class as a social science was beneficial to me as a student for my major. I thoroughly enjoyed Professor Matt Eaton and the way in which he taught his class. The only criticism I would have is that the exams were occasionally unclear in relation to what was expected of us versus what was taught in class. • I really would not change much. This is one of the only classes there were no surprises. We were told what we would need to do to good in this class. I don't like it when teachers add random things to the schedule with little to no warning. We are also not just given a PowerPoint presentation. Mr. Eaton actually writes out stuff on the board for us. • There could be a little more feedback on worksheets and things like that. • This class was great I have no requests! • This course was effective and I don't see any areas that should be altered. • My only feedback would be that we receive no feedback on our worksheets, but it has been communicated these are participation grades so if we want feedback we can come meet, so that is why I selected neutral because I do not feel we get a lot of feedback but that is also the nature of the course. • NA • N/A • I chose 3 to 6 hours outside of class because the concepts are very well taught and the assignments outside of class are a good test of understanding. Along with these assignments are practice tests which make it very clear and efficient to study the material. • Extremely lecture heavy • There isn't anything inherently wrong with the class, I just think that encouragement for students to understand it on their own terms could be useful. Like for me I would use chatGPT and other resources to explain all of the concepts in football card terms for example so I can better grasp each concept. • NA • There wasn't too much work, so I didn't have to spend too many hours on it. • I wish my instructor's office hours were a little different but I understand why his office hours were at the time they were at. I wish we went over the worksheets in class. • N/A • I think the tests sometimes did not reflect what was given for practice materials. There were some items that were helpful, but others that I studied for a while and still felt lost on the exams. I would also add more STRUCTURED practice in class with partners or groups to help better learn with application. • I did not spend a lot of time studying for this course but I also found the course rather simple and easy to comprehend. • N/a • I put a 3 for test feedback because there really was no individual feedback and we couldn't see what questions we got wrong. • I responded with a 2 regarding time spent studying, but that is a reflection of the student, not the instructor. • One of the few things that can be improved about this course is to add a few additional work problem sets before each exam and or section, just to give more material to review. • I think Projects would be good for this class so students can learn hands on with other students. • did not • Nothing is wrong with the workload, this was just the amount of time that it took me to complete my work and study. • The instructor clearly explained concepts, methods, and subject matter. Mr. Eaton did a very good job explaining everything, but I do think there is room for improvement. Such as an increase in student interaction, but again he did an amazing job.

11 - If you responded with a score of 4 or 5 for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please comment on what aspect of the course led to your score.

Response Rate	93/119 (78.15%)
---------------	-----------------

- Not
- This course is very well structured and taught. The class expectations are clear and not overcomplicated. The workload is not too heavy, but putting in time will definitely make a difference in your grade.
- I am satisfied with the instructors availability to answer questions and offer review time. I liked the review days where the class comes prepared with questions and he gives a great summary of ideas in this time. His office hours are also convenient.
- Professor was wonderful and great at explaining all topics making the class easy with how understandable it was. Pushed for questions and answered really well and wanted to make sure we knew the topics. Great teacher.
- Directions were very clear, had the same expectations each week, class was very well organized
- He was a very good professor that cares about his students. He is very easy to learn from and encourages students to ask questions or come by office hours for further clarification.
- I think Matt is a great teacher and is very good at explaining topics during class while giving assignments that help us understand the material more. There was never a time where I felt like I was just doing busy work or something that wouldn't help me better understand the material.
- Matt was a great instructor.
- Professor Matt Eaton was very thorough in the way he explained things and wrote everything on the white board as he explained. This was beneficial in fully understanding concepts especially when graphs were involved. He understood that many students might not be business majors and that it might need to be explained deeper than surface level for those of us who are not involved in the business major.
- Responds to emails, does group work in class, feel comfortable asking him questions, but sometimes following his lectures can be confusing because he just scribbles on white board.
- Communication, Understanding, mutual respect, and equal participation.
- This course was challenging but definitely helped me to understand micro econ.
- He clearly explained what was expected of us and all of the modules were posted online, which helped me manage my time and understand when things were due.
- Material was explained very clearly and thoroughly, and course objectives were very easy to grasp.
- He was always willing to help and makes time if you need the extra help. He also gave us worksheets and quizzes that were very helpful to summarize what we learned and test our knowledge on it.
- The structure of this class felt well thought out and executed, with assignments built to aid our learning instead of just keeping us superfluously busy. Lectures moved at a speed that was manageable to understand, and I enjoyed the handwriting of notes on the board as it allowed me enough time with them in front of me to transfer them into my notebook.
- Professor Eaton was awesome! He made learning easy and fun! The only thing I would change is slow down the notes while in class I feel like the material goes very quickly but when you check on the notes and go back after class it makes things understand better.
- I love Professor Eaton! He is so personalabity and can relay to the students on so many levels. He is very lecture heavy but if you go to class (which attendance is not mandatory) and pay attention you will for sure get a good grade in his class. There are 3 exams in total counting the final exam. He does exam reviews that are the same concept to the test, make sure you understand them. Overall, he is a really good professor you just need to show up to class.
- Professor Eaton was very good at providing our class with quizzes and worksheets to help with understanding the concepts so we won't be lost for the test. The examples he showed us during the lectures were also a very helpful way to learn material.
- The instructor always was willing to meet for office hours and highly encouraged students to schedule appointments.
- He was great and always had office hours available.
- The professor was very good at explaining the information so that assignments could be done quicker and correctly.
- The problem sets help a lot with the exams
- Well-spoken, offers help, communicates effectively and clearly.
- he is very open with questions and if you need more help on something he's more than happy to help
- This instructor is very knowledgeable and great at communicating all lessons to students. I never went into class and did not know what was being taught or expected of me.
- Professir Eaton was very easy to get in contact with which helped a ton. Especially when I had questions he answered quickly which was great.
- The class and instructor were decent
- Mr. Eaton is very good at teaching Econ. I have gained a strong understanding of the course from him, and like how he runs the course. He is a strong communicator and teacher.
- I learned a lot throughout this course and definitely have a much better understanding of economics as a whole leaving this class than when I first started. The lectures are fairly easy to follow and the concepts are explained well.
- I class was very informative
- Matt teachd the class very well and allowed us to make good grades
- The instructor allows students to ask questions during and outside of class. He is very open to meeting with students during office hours and does a great job of accommodating every student. His lectures are informative and include information on the exams.
- Professor Eaton taught very well and I could comprehend what he was teaching throughout each and every class
- Professor Eaton is a great teacher. He knows what he is talking about and can communicate his knowledge well to the students. His teaching style includes hand-writing notes on the whiteboard and connecting the topics to real life. He was the reason I was successful in this class.
- He was very nice to the class no matter what. He was also very helpful. If you needed hep with something he was always very willing to help you.
- Matt Eaton was a very good professor. He was able to communicate with his lecture class and get the message across. His lectures did get a little lengthy, but they helped in the long run. Some of the questions were bias and hard to answer but he did end up helping to explain them. I wish some of them were not on the test because some of the questions had multiple answers. For future classes, let them see the test results after you have finished grading everyone's test. I have bad test anxiety and not being able to know what I got wrong after the test is not anticipated.
- The exam reviews are very helpful
- His classes are very engaging and filled with examples. His notes can be found online but I found it much easier to learn in class as he explains some of the examples to a greater extent in class.
- I really like how he writes on the white board and fully explains the thought process behind each example.

Clemson University

202501 Spring 2025 Evaluations

Course: 202501-ECON-2110-007-10516-Eaton

Instructor: Matt Eaton *

Response Rate: 115/119 (96.64 %)

- Matt Eaton was a great professor. I felt very prepared for the exams due to the many examples we went over in class. He was very understanding and accommodating for me. I think this class challenged me and helped me grow my knowledge about economics.
- Explains concepts well and made class fun and interesting through lectures.
- The class was very enjoyable and teacher taught well!
- I think how adaptable he is was the most helpful thing he could do. Like in the beginning of the semester he listened to requests and made notes available before class for example.
- I liked how he made it clear what we were supposed to know.
- With the professor being very accessible out of class time, it was very convenient to get answers to assignment questions. He wants his students to succeed and that is very apparent. He did a help session zoom before an exam which was VERY USEFUL. None of my other teachers have done that but I wish they all would because that was more beneficial to me before an exam than PAL is.
- NA
- Mr. matt was a very good instructor and communicated the topics thoroughly.
- I enjoyed the practice worksheets provided, the quizzes that allowed me to see how much I understood from the previous class, and the consistant deadlines
- It was a good class. It challenged me but I did like the content.
- Matt would release the notes before the lecture, so if you could not see the board or get everything down in lecture, you had the resources to support your notes. There were weekly quizzes that related to the course material and before every exam there were practice sets that were very similar to exam questions.
- I really liked how we had weekly quizzes we were able to have multiple attempts at them. I liked how our professor taught on a white board and posted the notes that were done in class.
- The assignments were all really helpful for preparing for the tests
- He always had extra hours for us to study, and under every test he would ask if there was anything else that we were unsure about. he even hosted a study session on Sunday before the test
- Just a great teacher
- The aspect that led me to the scores I listed as 5 in this course is because of how much Matt wanted students to understand the material. He was super helpful with questions, and the class was very good overall.
- He was very engaging and he explains things so well and makes the concepts easy to understand.
- I thought your teaching style was easily followable and not super format which was nice, also the pre posted notes was good
- Everything else besides what I mentioned about exams I think everything was done very well in this class. Quizzes, worksheets, and instructions were good.
- I liked Matt as a teacher. He was easy to talk to and ask questions and was upfront about his availability. He also knew exactly how to teach the class simply to beginners in economics.
- He met up with me and went over my test for over an hour plus, super chill guy, he understands how difficult the class can be for no econ majors, and helped me get through it bro's a goat
- I believe that the study guides released before the test were very helpful toward my grade.
- I think Matt is a great professor, he is very clear about his expectations in the course and quite easy to reach. He also is very helpful when answering questions and easy to approach, he is also very clear when explaining concepts that are difficult and gives helpful examples.
- All the information he shared in class was usually then on the worksheets, quizzes and tests.
- Great professor.
- Professor Eaton did a great job involving students and relating the work in the class to real world situations.
- I love his teaching method of writing the notes on the board as we learn. Most teachers read off of a slide, and this makes sure I am able to keep up with the speed of the material.
- I loved this professor. he was easy to work with. His class didn't consume my life and the assignments that he gave were relevant and actually helpful. I feel that i really learned something! He was always available to answer questions!
- Professor was very attentive.
- He did a fantastic job of explaining the concepts.
- I think that the course was straightfoward and everything that was expected of us was explicitly stated in the notes and then reinforced by the homeworks, quizzes, and exam reviews.
- I liked Matt Eaton as my professor. He answered any questions students had and was very willing to help us out. The only problem I had was that it was kind of hard to pay attention in class as he talked the whole hour and 15 minutes and it was only note taking. I think interactive worksheets in class would've been helpful. The worksheets we do outside of class are very helpful as well but I think doing something in class would've made me pay attention a little more.
- I think that the professor did a good job of explaining to concepts of the course as well as provided examples in class to help understanding. There were worksheets and quizzes that related to the topics and helped better reinforce the knowledge in my opinion. The tests contained concepts that we learned and applied. The professor did a good job of engaging the students in the lecture and examples.
- I think Professor Eaton is a very good professor and he is very understanding of college students.
- The course was very effective in broadening my understanding of economics. He did a great job teaching the information and a clear and thoughtful tone that helped boost engagement and support performance
- This course was designed well, and taught really well. The expectations for the course were clear, and I was always well aware of when my assignments, quizzes, and exams were due. The professor provided so many examples in class that aligned with exam topics and honestly made it super easy to follow along and learn.
- I thought this course was very well structured and Matt is a fantastic professor.
- I put a 5 for question encouragement because every week there was a submission box for any and all questions that we could write something in.
- Matt Eaton does a good job explaining unfamiliar concepts in a way that students understand. The quizzes and practice problems were helpful for preparing for the exams.
- I felt the lecture notes were easy to follow. The quizzes and worksheets were great practice for the exams.
- I like the new implementation of worksheets. I think being able to get the tests back and review what you got wrong is very beneficial. Working out the material on the white board down the line chronologically makes it easier to understand the material. Additionally, all the examples given to a new topic in class help with this as well. Overall, great teacher.
- One of the best professors at Clemson; was very supportive and willing to help/answer questions inside and outside of class. His teaching style is unique, but worked really well for me. I could see how others could struggle with it, but the topic is also interesting to me so that might have a part in it.
- I think Mr. Eaton operated and ran the classroom and semester very organized and structured. He was efficient in outlining sections, methods, or material while also having clear availability and resources posted on Canvas to offer additional material if needed. I enjoyed the class and would recommend him as an instructor to anyone looking to take the course.
- Matt is awesome, I love the way he teaches and the assignments he provides are extremely helpful. He wants us to succeed, would recommend him highly!

202501 Spring 2025 Evaluations

Course: 202501-ECON-2110-007-10516-Eaton
Instructor: Matt Eaton *
Response Rate: 115/119 (96.64 %)

- this course challenged me but also humbled me
- The lectures were very informative, and the office hours were helpful. Gave good worksheets, quizzes, and exam practice problem sets that got me ready for the exams.
- I gave a 5 to the professor in the subject "The instructor clearly explained concepts, methods, and subject matter." because I feel that was very true, that Professor Eaton did an excellent job of articulating complex concepts that made them much easier to understand and use in practice.
- Matt is a great teacher and a great person to go to for help. I failed this course last semester with a different, also young, teacher. He had a way of doing things that was very specific and it made studying and preparing for his exams a lot harder. With Mr. Eaton it has been much more enjoyable to learn microeconomics. He is a solid guy.
- I thought that the exam review questions were very helpful when studying for the exams.
- Overall, I just liked the course. Nothing wrong.
- Overall, I just loved having Mr. Eaton as a teacher. He worked with me outside of class extremely well and I appreciate that from a teacher who is not required to do so.
- Good at lecturing. Keeps the class updated on any changes. Exams are straightforward. Opportunities for points outside exams.
- Professor was always available when needed.
