10 - If you responded with a score of 3 or below for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please describe a change that you believe would improve that aspect of the course.

Response Rate	13/51 (25.49%)
- I felt like the concepts could've been explained better - Some of the questions in the review for the midterm were worded confusingly. - The only question I answered with a 3 or below was the amount of work hours put in outside of the classroom. I feel that the work my professor has given us has been more than fair, and honestly could have increased the load. - I don't think anything would need to be improved, I simply just took a really long time studying for the midterm, and the worksheets and quizzes took me a long time to complete. - I think that maybe professors should encourage new students to reach out no matter what to make them more comfortable. For example having the first assignment be writing an email to the teaching introducing yourself. - The teacher knew a lot, but he just went through the content really fast when in class. It would be beneficial if he slowed down a little to let us all catch up on our notes. There was also not a ton of work to do outside of class. so that is why it was 3-6 hours. - Please hand out physical worksheets to the students or make them entirely digital. Repeatedly printing out worksheets and then rescanning them is an unnecessary task for students. This responsibility should be handled by the professor/teacher. - I need to work harder to get my assignments in and actually submitted. - NA - No changes needed - I put 2 for the feedback on work. There is no real feedback on work, but rather just a number score. You don't get much out of homeworks and quizzes other than free points but at the end of the day you don't know if you're doing it right. - N/A, all items were rated above a 3. - I did not score anything a 3.	

Clemson University

202605 Summer 2026 Evaluations

Instructor: Matt Eaton *

Response Rate: 46/51 (90.20 %)

11 - If you responded with a score of 4 or 5 for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please comment on what aspect of the course led to your score.

Response Rate	34/51 (66.67%)
---------------	----------------

- He had a lot of office hours
- He taught very well with lots of example to help us relate to class. The homework was only to help us and was good practice. Overall great teacher because he wanted us to do well and gave us all the materials we needed.
- The course was designed well and went in depth in all of the aspects of microeconomics, the professor taught well and helped us all understand the material, and the worksheets/quizzes we got directly related to the material learned and were very helpful practice for the exam.
- Instruction, assignments, and study time all led to an incredible personal engagement in the class and the subjects covered in it.
- Professor Matt's Microeconomics class was excellent, and a lot of that came down to his teaching. He explained tricky concepts like supply and demand and elasticity in a clear, easy to follow way, and used real world examples that made everything click. He was clearly passionate about the subject, which made the class engaging. The course was also well organized. Topics built on each other logically, so the material never felt overwhelming or random. His tests and assignments matched what we actually learned in class, so studying felt useful instead of stressful. Overall, Matt created a class where I felt comfortable asking questions and actually understood the material by the end. I'd definitely recommend this class and this professor to other students.
- Notes and assignments helped me feel ready for midterm and finale exam.
- He was a very good and helpful teacher, he explained stuff very well and answered questions very helpfully.
- Mr. Eaton communicated what was expected of us throughout the course extremely well. His work load both inside and outside of class was very reasonable and connected directly back to what we were required to learn.
- What is expected of the student in this course and the pacing required to keep up is made very clear.
- He always had his office hours open and was always willing to answer lingering questions after class.
- I feel like Matt did a great job teaching the concepts that we had to repeat on the worksheets and quizzes. I didn't find myself needing to use a lot of outside resources because my notes were so good.
- One aspect that led to my score would be his communication with students. He has very open office hours and, since the class size is smaller, has been able to give us plenty of time to communicate any issues, concerns, or questions we may have. Although I haven't personally felt the need to take action on this, I feel that several students have and benefited from thereof.
- I think that for me the teaching was very good I was able to understand the professor but also I was able to write notes and learn on my own time and do things that helped me understand if I truly understand the course on my own.
- Mr. Eaton was a great teacher and while I am awful at any kind of math he explained in a way that I could somewhat grasp
- The engagement in class and the openness to discuss issues. Also the feedback given on homework assignments to better learn mistakes or errors.
- The professor had set up office hours every day and was available via email for any questions or comments about the course. He also held a class the day before the midterm exam for students to ask questions which was really helpful exam prep.
- The course was structured well and gave a good insight into the introduction of microeconomics.
- I liked the structure of the class a lot, even though it was fast paced my professor did a really good job of explaining all the topics. He also did very well at explaining everything in a interesting way.
- I was very successful in the class. I also feel like I learned a lot, even though it was only 5 weeks.
- I believe Mr. Eaton made it very clear what was expected of us during this course. He always gave us a heads up about upcoming assignments, tests and what we needed to study for the midterm and final. Furthermore, everything we learned and did in this course was related to economics and required us to use critical thinking skills to solve problems.
- The concepts were clearly explained and the supplemental course work helped reinforce the material.
- I think my teacher did a really good job being available for students and making it clear that he wanted to help us understand the material better.
- The notes posted are the exact same as he goes over in class. Very perfect notes to understand and get to the point
- I thought that this course was so well organized and very communicative.
- I enjoy this course
- I like how the teacher explains things and ties stuff together he's very good
- He held office hours everyday after class, which I liked
- I gave 4s, and 5s, because I think Mr Eaton is a very good teacher and because he always communicated effectively with us. Mr eaton also provided plenty of study materials for us which was very helpful. I also think he was very approachable and easy to ask help from.
- professor eaton was very communicative about his availability for outside of class help. he was engaging and overall made microeconomics easier to learn.
- Instructor was always available, gave clear lectures, relatable examples, good feedback, and was overall a good Professor
- Every topic in this course was very well explained. I felt as though the quizzes, worksheets, and work outside of class prepared me for the tests and linked well with the material currently being learned. The teacher made taking notes simple with his lecture style, allowing me to better understand the topics.
- I really enjoyed the freedom of the course. This was my first econ class ever and it was pretty enjoyable.
- I liked the fact that you wrote on the white boards as you were explaining the material as this ensured that you covered each of the concepts as you talked about them. I thought you explained it really well even covering topics like the law of supply and demand multiple times during the lectures. You did a good job of showing how the topics built on each other.
- I gave a 4 or 5 because I knew what was expected of me, the concepts were explained in depth, and the instructor encouraged questioning and discussing in class.
