| <p>• He went a bit fast with the information and would write so much down on the board that we had to copy and then ask us if we understood, but I am still writing down the last points he wrote before. I can't say if I understand because I am not where he is at, and then he would move on. Once I got to where he asked if we understood, I didn't understand, but he had already moved on. Besides that, he was a great teacher who taught it well and wanted to help. I went to him after class a lot to look for the things I missed, and he was super helpful!</p> <p>• I responded with 1 on the time that I spend, I didn't spend more time, since I personally didn't need to.</p> <p>• N/a</p> <p>• Write bigger and slower and also allow for more explanations when it comes to shifters</p> <p>• N/A</p> <p>• We did very little group work or discussion, but it was also 8am and no one was eager to socialize.</p> <p>• I responded with a 3 for a few of the questions because there were some points in the class that were foggy sometimes. I also thought that it was a struggle to do well on the test, as it was tons of information on each one.</p> <p>• We could have had more things like worksheets so we could engage in the material more. The quizzes were helpful, but maybe having one more thing to help learn the material would be good.</p> <p>• N/A</p> <p>• Nothing I think it was a perfect amount.</p> <p>• I would require attendance, this will allow for more students (including myself) to HAVE to show up to class, without a requirement to show up to class then attendance overall will be lower than if it were required. I know we are paying tuition but if attendance is not required people will not be motivated enough to go to class. I apologize myself for not showing up but I believe even as a skipper that required attendance is best for any class to make sure students show up. When I did go to class, I appreciated your teaching and you were good at teaching students, you just cannot use those good teaching skills without students in front of you so I believe that mandatory attendance will boost your overall grades but probably an entire letter grade.</p> <p>• I really liked the fact that we only had one weekly quiz for this class, they helped me understand and helped my grade but it's not too much work. I just put 2 for student engagement because I only study around our exam, and the only work I do for the class is the weekly quiz.</p> <p>• The material he taught was not the easiest to understand. He had well thought out notes but sometimes it was more of copying down a bunch of words rather than actually learning the concepts.</p> <p>• I think that Matt Eaton is very smart but honestly too smart for his own good. Sometimes, I struggled to understand what he was teaching because it felt like he assumed that we all knew the basics of microeconomics. I am not naturally good at Econ so I struggled to understand the basis of what I was learning since he taught at a high level and pace.</p> <p>• More thorough explanation is needed regarding certain topics discussed in the class.</p> <p>• Super nice and willing to help but sometimes instructions for certain topics were a bit unclear.</p> <p>• I answered with a 1 for how many hours I spent on the course per week because it was under 2 hours outside of the class. There was not much work other than weekly quizzes and keeping up with in class notes, so only on weeks leading up to exams I would go over 2 hours spent on the course. I do think maybe adding some sort of homework could be helpful to keep up with reviewing the material other than the weekly quizzes.</p> <p>• I think that the in class lectures were very hard to follow and the writing on the whiteboard for every single word, not just main points made this course really hard to learn. I believe I could have spent a little more time on this outside of class however the lectures were very confusing and way too fast. I don't think we had enough out of class assignments to make the information stick and get the repetition we need to succeed. I feel like I did not learn much during lectures because how fast he talked and how much information he wrote on the white board. And it was hard to read.</p> <p>• I noted a 3 for the time I spent outside of class. This class was very manageable with work and not overbearing with reading.</p> <p>• /</p> <p>• What I think can be improved in the teachings of this course is the understanding and pace of the assignments can get difficult. For me I need more practice on economics with mostly understanding the concepts so more homework on concepts would be beneficial.</p> <p>• n/a</p> <p>• There was not enough work to do more than 2 hours a week, which is not a bad thing.</p> <p>• n/a</p> |             |

## 202408 Fall 2024 Evaluations

**Course:** 202408-ECON-2110-027-88071-Eaton  
**Instructor:** Matt Eaton \*  
**Response Rate:** 48/48 (100.00 %)

### 11 - If you responded with a score of 4 or 5 for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please comment on what aspect of the course led to your score.

**Response Rate** 32/48 (66.67%)

- The class was very open and Mr. Eaton allowed for each student to learn at their own pace whether that was in person or at home. He answered questions clear and precise.
- He clearly stated what we are learning, how we will be learning it, and what will be on all the exams. He always wanted to help you fully understand if you asked him for help.
- Feedback was clear through the open review days and the class days dedicated to going over exams. Weekly quizzes were beneficial in judging personal understanding of current content.
- I got out of the course what I expected and wanted, so I'm satisfied with the course.
- The comprehensive review and study guides along with the detailed notes from class.
- I liked we could meet on zoom for questions. Review days in class as well.
- There was many chances for success whether it was zoom meetings, questions after class or emails. Very pleased with the help I received throughout the semester.
- The course design was fine, all the notes were written on the board so each student could write them down. We were all given a fair opportunity and were prompted to succeed through the practice question sets.
- Mr. Eaton was very good at lectures and I felt that his office hours were very helpful. He had quizzes each week that helped us put into practice what his lectures were about.
- The work outside of class was minimal but efficient. I was able to understand and review the most important topics with the weekly quizzes and could study as necessary. I appreciated that help was available when needed and he was quick to answer questions over email.
- This professor truly cared about us as students. He strived to make sure we understood the material and would send out lengthy emails of problems worked out that we were confused on. He always asked us how he could help us better understand the material and was super helpful.
- He highly encouraged discussion and questions in class. Always willing to answer questions.
- I scored many items high because of the design of the course. I like the handwritten notes on the board they allowed to help keep up with writing notes on the computer. I felt like there were always opportunities to go speak with the teacher, and he could explain what was wrong very well.
- My professor answering questions that I had or fellow students.
- I generally thought this course was a good level of challenging material mixed in with concepts being taught well. There were only a few times which concepts weren't communicated well.
- It was a fun course and the content flowed smoothly and was easy to follow
- This class had many example questions to make the learning easier, and it was very definition lecture heavy which we practiced through the quizzes at the end of the week, which very much helped.
- The way he taught felt different and better than other professor which led to my success .
- class is very well organized and there is a lot of resources and material to help understand topics.
- He really made me think in this class. It forced me to learn on my own time and apply the notes to my quizzes and especially exams.
- I could have prepared myself more for the exams. The resources were present and it has been much appreciated. Sometimes the transition from notes on the board and understanding can be a little confusing.
- Teacher took time to explain things fully, and always made sure to check for questions and answer them if needed.
- Very understanding and responds to questions and emails very quickly which made it less stressful and easier to succeed.
- I answered a 5 for the question of what is it expected of me, because the teacher does a good job communicating what it is expected of students on a weekly basis and communicated due dates.
- I think he is very easy to reach out of class which is great. I emailed him about a test correction and within the hour he sent me a very in depth response which I appreciate.
- I was very satisfied with my instructor and is teaching methods. His lectures were clear and concepts were attainable. The work was not too much but he also challenged us to think in class.
- The instructor clearly communicated our roles and responsibilities throughout the course, provided helpful feedback, and made an effort to help us succeed.
- I like the pace that we were learning at, the notes were always really clear and many examples were provided.
- I appreciated the effort of the PHD student and the mapping of the coursework although it wasn't executed well. The class I enjoyed and the PHD seemed to care about the class.

- The course is very notes heavy but the way he explained it over and over again made it make sense. Especially with the graphs and all that, doing multiple examples helped me understand.
- He is a good teacher, very lecture heavy, but made the topic easier to learn.

### 12 - The course helped me develop my analytical skills.
