Response Rate	13/39 (33.33%)
• I wish the course was a bit more interactive with my classmates, this is not entirely the teacher's fault, but my class was not very talkative. • Homework did not take much time, quizzes were short. Not a complaint. • The statement about thinking critically and communicating clearly about the subject is the one statement I put a 3 for. While I think this course can be challenging at times, I also think a little more complex problems in class for practice would help students understand the concepts better and find the normal problems a lot easier to deal with going forward. • N/A • n/a • I put 2 for how much time I spend on work outside of the class but this is the appropriate amount for learning outside of the class. • I have been busy with other school and life stuff but our professor made really easy for us to keep up with our classes so i just needed to work 2 hours • There was limited feedback on worksheet assignments as they were graded for completion however they were easy to do and if you attended class it is likely you would not need feedback on these assignments anyway. • It did not challenge my thinking very much • I did not. • N/A • N/A • Nothing. Only required work outside the class was studying and study material. This course solidified by Microeconomic knowledge inside the classroom.	

Clemson University

202508 Fall 2025 Evaluations

Course: 202508-ECON-2110-021-81735-Eaton

Instructor: Matt Eaton *

Response Rate: 39/39 (100.00 %)

11 - If you responded with a score of 4 or 5 for one of the previous items in course design, instructional practices, assessment practices, course impacts, or student engagement, please comment on what aspect of the course led to your score.

Response Rate	32/39 (82.05%)
---------------	----------------

- In our weekly assignments there would always be a box to submit anything we were struggling with in the course and or what we wanted him to do differently while teaching, as well as he was always available during his set office hours.
- I think the teaching was straightforward, and I received good grades for this course.
- He was very open and approachable and has ample office hours for his students.
- Constant work weekly with thought-provoking questions provided the opportunity to complete extra work related to the class as well as bringing any necessary questions to the instructor.
- He communicated very well, answered all questions, and is very easy to talk to and ask for help. He clearly outlines in the beginning of the course the structure and timeline of the class. He does everything he can to help the students out and is very understanding.
- I responded with a 4 or 5 for all aspects of the course design section. I believe I put this because from day one it was made clear that you were expected to take notes on what was going on in the class and apply those to the home works. The home work was also very effective practice for the tests as the questions ended up looking very similar especially questions on the test review practice problems.
- I like the teaching style of this class
- He really helped us understand microeconomics. In high school I never was good at econ and figured I would just never understand it for the rest of my life, but now I actually enjoy it and really understand it. He is just really good at connecting econ to real world examples that really helps me to understand.
- I put 4-5 for all the other sections because the class is structured well and doesn't need anything changed.
- Matt covers every topic in depth and promotes student participation. He is also available for office hours outside of class. He gives his students a quiz biweekly that covers all topics that we learned those weeks. We get feedback on the quizzes which helps us know what we need to review the most.
- I feel like the information was clearly stated in the course syllabus. I like the way Matt teaches and he's very helpful before exams with any questions.
- The teachers enthusiasm and teaching style is effective
- The expectations and goals are clear. It is clear what you need to learn before the test and explanations were good. The course is designed very simply and is effective.
- The course was well designed and well communicated, with clear due dates and deadlines.
- I think he was really great at breaking down the concepts to the bare minimum, and it made it easy for everyone to understand, even if you aren't an economics major.
- He taught concepts well in class and made it relatable to everyone in the class. My professor was willing to meet with me at office hours and reexplain topics to me and would stay longer to make sure that I understood the concepts. He also was willing to meet with me to improve my scores and identify what I was doing wrong.
- I thought Matt Eaton was very organized, had very good notes which he put on canvas to give to us, and did a great job explaining concepts that helped me learn. I thought at times the class could be very boring but overall I really liked this class.
- The notes and exams correlate very well, it allowed for me to know what i am learning in class will actually transfer on exam day.
- I liked how we did notes
- I took this class at my last university before transferring and did poorly despite being engaged in every class and even with exams being open-note. Matt Eaton has done a tremendous job explaining concepts and using class time appropriately.
- I liked the structure of the class and the lecture style helped me understand the concepts. I liked how we could use our resources on the quizzes, as it felt more like practice than a grade. It helped me learn the material. All of the worksheets, study guides, and quizzes were very helpful.
- All around great was very straight forward which made it simple to navigate through his class!
- The class material was explained well. Even though the material was hard I understood it well. The instructional practices were very helpful.
- He held office hours, always happy to answer questions, and provided helpful practice to help me better grasp the material.
- I really enjoyed the way Matt structured his notes, so all the curriculum could be seen in canvas and it was very easy to follow and learn. The workload was a perfect amount as well.
- The quizzes, worksheets, and practice tests provided by the instructor helped me succeed in the course.
- Mr. Eaton was very easy to talk to and very helpful with any questions. He brought a sense of understanding that we are all living lives, too. Awesome teacher.
- He is an overall good professor. Responds to emails, is willing to help, and does a good job overall teaching the course. I don't really have anything negative to say about him.
- Professor Eaton is a talented lecturer who makes the course material engaging. He has limited work besides exams which is ideal in the modern ChatGPT age. I would ask that the exams he makes worth so much of the grade have more variety other than multiple choice, perhaps a graded discussion portion that will encourage students to better understand the trends that spur from altering a market in equilibrium.
- I thought the class was very informative and one can tell Matt really cares about economics. His method of teaching made me feel engaged each time I went to his class in which he gave us real-life examples for each topic he taught us. The homework that he gave us also was very helpful for studying for each exam.
- The exam reviews were super helpful as someone who never knows how to study or where to start when studying.
- Great professor, good knowledge and good way to teach freshmen coming from another student, albeit a different leveled student.
